

Dear hiring team at Orderchamp

I am writing to express my interest in joining your esteemed company as a coding and data analyst entertainer. I am currently a second-year student at the University of Amsterdam, pursuing a Bachelor's degree in Business Analytics.

Throughout my education and personal experience, I have developed a strong background in machine learning, data science, and regression models. My approach to problem-solving is centered on research and analysis, which is why I found operations research to be one of the most enjoyable subjects for me. Moreover, I wanted to move abroad as fast as possible, not because I don't like my family, but to challenge myself. Working in different parts of Europe improved my communication skills greatly.

One of my biggest inspirations in pursuing a career in technology combined with finance has been my uncle, who is a senior cyber security developer at Citi Handlowy bank. He was the one who first introduced me to coding and sparked my interest in this field. I am also passionate about following start-up trends, new market developments, and financial investing, such as stock markets.

I am confident that my skills and approach to problem-solving make me a strong candidate for a role at Orderchamp, and I would be honored to have the opportunity to contribute to your team's success. Thank you for your time and consideration.

Sincerely,
Jakub Waszczak
